

EXHIBOT 2.0

Nigeria's Ultimate Battle-bot and Robotics Show

Brains. Objects. Technology #BOT

#BOTMindset #Exhibit2.0

CORE MESSAGE PILLARS

□ BRAINS — African Ingenuity on Display

This is about the minds behind the machines. Young Nigerians and Africans thinking, calculating, improvising, and outsmarting opponents in real time. Strategy, intelligence, and creativity decide who wins — not luck.

⚙️ OBJECTS — Machines Built Here, Built to Battle and Solve Problems

These are not imported fantasies or lab demos. Every robot is a physical manifestation of local skill — designed, welded, coded, and stress-tested to survive impact, speed, and proffer solutions to certain sectors.

□ TECHNOLOGY — The Future Made Real

AI, automation, sensors, control systems, and hardware engineering collide to create something once seen only in movies. Exhibit proves the future is not coming — it's already built here.

TARGET AUDIENCE

Primary:

Tech-savvy youth (16-35), gamers, tech creators, robotics and engineering students

Secondary:

Corporate brands, media, influencers, content creators, government institutions, school heads

Extended:

Families of participants, general audience seeking innovation, stakeholders

TONE & VIBE

Movie vibes — something unbelievable that can only be seen in movies. Futuristic, competitive, visionary, and feels like home (built here, no alien or imported feel).

Cinematic

Futuristic

Competitive

Visionary

Homegrown

EVENT OBJECTIVES

- Position Exhibit as a national brand through strategic placements, articles, clips, and creator partnerships
- Drive mass awareness about robotics across Nigeria and Africa
- Attract more members to the community, including experienced robotics enthusiasts
- Attract investors and boost Exhibit's confidence at negotiation tables
